Vehicle Turntables

DriveAway Turntable

The DriveAway is an economically-priced vehicle turntable for the domestic driveway designed to solve a multitude of access, manoeuvring and parking problems. Used on a flat surface, it will enhance the home and resolve vehicle manoeuvring issues by:

- **Providing a safe and efficient solution to driving on and off busy main roads by eradicating the need to reverse**
- **Eliminating the need to undertake awkward manoeuvres or reversing procedures in the driveway**
- **Improving access to driveways with a narrow entry**
- **Making it easier to negotiate long or twisting driveways with restricted views**
- **Ensuring that garden areas do not have to be sacrificed to create extra parking and turning space for vehicles**
- **Being easy to install, requiring no electrical power but being simple to operate**

The DriveAway may also help householders overcome planning permission issues relating to highway access when renovating an existing property or building a new home.

Brought to you by Gate Automation Systems (Irl)

Specifications:

Overall turntable diameter including static angle ring surround 3640mm (143.3")

Turntable height 70mm (2.75")

Max suggested vehicle load 1800kgs (3960lbs)

Max recommended wheelbase of vehicle 2600mm (102.4")

An investment for the future

Because of its economical price, the DriveAway will represent a long term investment in the home, adding value where difficult or awkward access onto main roads exists. If the time comes to sell, the turntable can add value to the property or can be taken and utilised in the new home.

Easy installation

Supplied as a kit and designed to be installed on a smooth, flat surface, the DriveAway is very easy to selfassemble.

Full installation details are provided with the kit, showing how 2 persons - home-owner, handyman or builder - can assemble the turntable in around 6 to 8 hours.

Olympian 4.5 Turntable

If it's a full-platform revolve that you are looking for then you'll find the **Olympian** is the leader in style and performance. Designed as an above-the-floor unit for showrooms that cannot accommodate a turntable pit, the unit is available with a 4.5 metre/177" diameter, providing the ultimate in portability. Totally finished with an attractive deck, the 4.5m model also has a static kerb surround to add that extra special touch.

Extremely robust and built to the highest standards, the Olympian can be assembled by two people in around 30 minutes with no special tools required. For adding eye-catching style and flair to your showroom or exhibition stand, the Olympian is a clear winner.

When you need to draw attention to something really special, the Olympian 4.5 vehicle display turntable is the ultimate in sophistication. At 4.5 metres/177" diameter, this low-profile revolve offers a 2,000 Kg/5,500lbs capacity to accommodate larger, prestige vehicles. Popular the world over, this revolve adds to the luxury of your showroom surroundings and is also portable.

- Up to 2,000Kg/5,500lbs capacity
- Self assembly - no special tools needed
- No floor fixing required
- Variable speed drive
- Attractive, fire-retardant deck
- Mains powered
- Slip rings enable electrical power for special lighting etc.
